OCONOMOWOC, Wisconsin —

Taylor Dynamometer of New Berlin is building a new 55,000 square foot office and manufacturing facility at 3602 W. Wheelhouse Road in Milwaukee. They are moving operations from New Berlin to Milwaukee's newly revitalized Menomonee Valley industrial district. Taylor Dynamometer is a leading manufacturer of dynamometers used to test engines. MSI General Corporation of Oconomowoc has been chosen for the design and the construction of the new facility.

MSI General recently completed the new 21,600 square foot Badger Railing facility on Milwaukee Road just Southwest of the Taylor Dynamometer site in the Valley. For over 50 years Badger Railing has done custom fabrication of steel stairs, ladders, industrial and ornamental wrought iron railings and fences for the metropolitan Milwaukee area. Badger Railing made a deliberate decision to maintain their presence in the Menomonee Valley when it was necessary for them to relocate to a new facility.

MSI General Corporation, a design/build general contractor located in Oconomowoc, is a leader in the design and construction of commercial, educational, industrial, municipal, religious and retail facilities in southeastern Wisconsin. MSI General was founded in 1957 and is celebrating 50 years in the industry.
